

Entrepreneurship Development Programme

From Grower
to Entrepreneur

Packaging of Fresh, Minimally Processed Fruits, Vegetables and Processed Food Products

03rd - 05th September 2019

An ISO 9001-2015 certified organization

**ICAR-Central Institute of Post-Harvest
Engineering & Technology**

Ludhiana, 141 004 (Punjab)

Background of the EDP

Processing activities are of critical importance to expansion and diversification within the food processing sector as they increase market opportunities and add value while minimizing post-harvest losses. Packaging of the processed or fresh produce further improves the viability, profitability and sustainability by increasing farm incomes, and generating rural employment and foreign exchange. Food packaging has developed strongly during recent years, mainly due to increased demands on product safety and quality, shelf-life extension, cost efficiency, environmental issues, and consumer convenience. In order to improve the performance of packaging in meeting these varied demands, innovative and novel food packaging concepts are being developed, tested and being commercialized at a very fast pace.

Main Topics

Food packaging concepts: MAP, Shrink Wrapping, Vacuum Packaging

Packaging of fruits, vegetables, spices, dairy, meat and fish

Knowledge gaps, technical knowhow & quality evaluation of packaging films

Minimal processing of perishables

Instrumentation\ machinery & New packaging materials
