

ICAR-CIPHET organized an EDP on 'Oat Processing and Value Addition' during January 18-19, 2019

ICAR-Central Institute of Post-Harvest Engineering and Technology, Ludhiana has organized an Entrepreneurship development programme (EDP) for oat growing farmers on 'Oat Processing and Value Addition' from January 18-19, 2019. In this EDP, progressive farmer from Sri Ganganagar, Rajasthan attended the EDP. Dr. Mridula D., Pr. Scientist & I/c Head and Er. Chandan Solanki, Scientist, FG&OP Division were the Coordinators of this programme. This

two days EDP was designed to give farmer a complete exposure to the basic concepts of processing and value addition of oat grain, dehulling of oat, oat flour, oat *dalia* and oat based food products. It comprised of lectures, practicals and hands on training by the coordinating team from Food Grains & Oilseeds Processing Division. During the valedictory function, the farmer expressed his overwhelming response for the training received during this EDP. Speaking on the occasion, Dr K. Narsaiah, I/c Head AS&EC Division and I/c Director motivated the participating farmer to enter in food processing entrepreneurship in the area of food grain processing.
