

Entrepreneurship Development Program (EDP) on Aonla Processing and Value addition

Aonla (*Emblica officinalis G.*) also known as the Indian gooseberry, is one of the richest sources of Vitamin C. The crop is most ideal for arid regions like Abohar, Sriganaganagar etc. Since, the processing of this particular fruit is not yet commercialized and the growers want to acquaint themselves with the processing of the fruit and established cottage, small and medium scale industries. There are certain products which are prepared using Aonla such as **Juice, RTS, Squash, Murabbas, Pickles, Candy, Jelly, Jam** etc. For the purpose of value addition as well as from the perspective of reduction in post-harvest losses in Aonla crop, Horticultural Crop Processing Division, ICAR-Central Institute of Post-Harvest Engineering and Technology (ICAR-CIPHET), Abohar is going to organize a EDP and hands on training for 3 days starting from 29th February to 2nd March 2016.

Training fee is Rs. 3000/- (Training registration fee is Rs. 2000 + Operation and other expenses of training materials etc Rs. 1000). Breakfast/Lunch/Dinner and Guest house facility will be provided on payment basis, if available.

To attend the training and for more details kindly contact.

Dr. Dattatreya M. Kadam,

Principal Scientist & HCP Division (Add. Charge)
